NOTES FOR MR. DUCKETT

Col. Howard's paper on reorganization, computerization of the SOC is now in General Stewart's hands. The latter is highly motivated to resolve the issue as per Howard's recommendations, before he leaves the NRO (1 February). He plans to present the recommendations for the large computers and additional space to Flax on Monday, 23 January. Flax appears to believe that he has the implementing authority and no evidence exists which indicates he plans to really surface the problem for ExCom decision. If the general issue of the function of the SOC is to be examined from the fundamental viewpoint as presented by [Redacted] to you Friday, 13 January, the subject must be raised with Flax expeditiously-- or sooner.
